

Dear Murex Talent Acquisition Team,

I am writing to express my strong interest in the **Software Engineer (C++ / Java)** position at Murex in Paris. With **8+ years of experience** designing and optimizing **high-performance, low-latency distributed systems** in the **financial** and telecommunications sectors, I am confident in my ability to make an immediate impact on your engineering team.

My technical background aligns exceptionally well with Murex's stack. I bring deep expertise in **modern C++** (up to **C++20**) and **Java (17)**, specifically in building **scalable, mission-critical architectures** that process **millions of daily transactions**. My experience optimizing complex backend systems for **throughput** and **latency** directly translates to the demands of the **capital markets** software you develop.

On a personal note, I am highly motivated and fully prepared to **relocate to Paris** for this opportunity. I have long admired Murex's position as a global leader in financial technology, and moving to France to join your Paris office is a deliberate and exciting next step in my career.

I have attached my resume, which details my technical achievements and performance metrics. I would welcome the opportunity to discuss how my background in **high-volume financial traffic** and **modern software engineering** can contribute to Murex's continued success.

Thank you for your time and consideration.

Sincerely,
Mohammad Hossein Ghaseminejad
